

STOP IDLING.
START \$AVING.

THANK YOU FOR NOT IDLING.

Clean Cities and
Communities

According to Argonne
National Laboratory research:

- ☐ Idling uses more fuel than does restarting your car.
- ☐ You will not wear out the starter or the battery.
- ☐ Idling a car wastes about 0.3 gal/h and a big truck about 1 gal/h.
- ☐ Reducing idling supports cleaner air.
- ☐ In some locations, idling is illegal and can result in substantial fines.
- ☐ Idling gets you nowhere!
